Sonifex Mixer and SOL-T12 at Radio Lollipop launch: A Sonifex S2 mixer has been installed at a new studio for Radio Lollipop at the Evelina Children's Hospital in London. Set in glass walls, underneath the glass atrium of the hospital, the new facility is complemented by Sonifex's S2 Solutions clear perspex range of studio furniture. "The Radio Lollipop Evelina project was a lovely, positive project to be involved with because of where it was and also the enthusiasm of the project team," comments Richard Butlin, technical sales manager at Sonifex. "The design of the studio is amazing and I'm sure will bring a lot of happiness to the children." www.sonifex.co.uk
