

## Silent treatment from Sonifex

---

**A NEW** addition to the Sonifex Redbox range of studio products is the Redbox RB-DSD1 digital silence detection unit, which is intended for use in radio station master outputs and transmitter sites, switches between two digital inputs on loss of audio signal.

Similar to the existing Sonifex RB-SD1 analogue silence detector, the new digital version has AES/EBU, SPDIF and TOSLink digital inputs and outputs, selectable silence duration and gain threshold, manual or automatic return and TTL word clock and AES/EBU sync inputs.
