AVN-CU2 & AVN-CU4 RAVENNA Firmware Versions			
Version	Date	Changes	Description
3.24.2995	14/05/2026	Fixed	Update firmware allows different variant of build to be installed.
3.23.2928	02/04/2026	Fixed	Audio routing grid does not redraw properly when zooming in and out in the browser.
		Fixed	Websocket connections get re-established when not needed if switching between pages quickly.
		Fixed	Large Audio routing grid page fails to load.
		Note	During firmware installation, screens may remain blank (up to 3 minutes on AVN-CU4). Do not switch off the unit.
3.22.2893	06/02/2026	New	Add marker to strlist for vendor ID mDNS announcements for the webserver service.
		Fixed	Comm 4 missing from talk-back C and other minor webpage issues.
3.20.2830	05/08/2025	New	Reinstates communication between main firmware and ZMAN module (via UART).
		New	Handle ZMAN comms process restarts (oem_ui_process) when IP address changes.
		New	Link to the ZMAN advanced web GUI in the AVN-CU configuration tab.
		Note	ZMAN module firmware must be updated prior to updating the main firmware.
3.19.2815	24/07/2025	New	Configuration file allows for a static ARP entry.
		Note	Advanced Settings button not available in UI; access via manual URL using ZMAN IP.
3.18.2799	13/06/2025	New	Initial release for RAVENNA versions.
		Note	Advanced Settings button not available in UI; access via manual URL using ZMAN IP.
